

Lakshmi Mampatta

lakshmi.mampatta@gmail.com

<https://linkedin.com/in/lakshmimampatta>

Date of CV: 10.06.2026

Objective

To contribute as a dynamic team player in interdisciplinary research, with a specific focus on the intersection of technology, society, and human experience. Seeking to apply my experience in identifying system weaknesses, analyzing failures, and understanding how technical and human factors affect AI reliability to support the development of trustworthy intelligent systems.

Education

MSc in Business Analytics (Information Processing Science Track), University of Oulu, Finland, 2023-2025, GPA: 4.7

Bachelor of Technology (Computer Science and Engineering)

Calicut University, Kerala, India | 2004 - 2008

Publication Work

- **No Caste, No Crowds, and Robots for All: Children's Values, Hopes, and Fears in the Designs of their Future Classrooms** (Published - CHI Conference 2026) Authors: Sumita Sharma, Lakshmi Mampatta, Netta Livari, Grace Eden, Pauli Klemettila
- **Beyond Efficacy: A Multi-Stakeholder Study of Deployment Constraints in Immersive Digital Therapeutics for Adolescents with ADHD** (Accepted - TKTP Conference) Authors: Lakshmi Mampatta, Sameera Bandaranayake, Pasi Karppinen, and Antony Korsah.
- **Future of Digital Interventions in Epilepsy Care: Needs, Scenarios and Possibilities** (Published - MIE conference) With: Manria Polus, M3S Team, University of Oulu

Work Experience

Research Experience

University of Oulu | Feb2024 - Present

- Conducted a qualitative study on user experiences in virtual environments and applied Gioia methodology with NVivo to inductively develop a multi-stakeholder thematic framework.
- Developed questionnaires and conducted semi-structured interviews with multiple stakeholders.
- Utilized the sociotechnical lens to understand the future imaginaries of young children about the usage of AI in their future classrooms.
- Conducted participatory and scenario planning workshops
- Conducted thematic analysis of data gathered from a participatory workshop where young children envisioned their future with AI and emerging technologies.
- Developed a prototype of a virtual environment activity using the Unity engine and C# programming for a hackathon event, which was related to my master's thesis.
- Conducted survey research to perform market analysis of a rural real estate company in Finland.
- Co-authored manuscripts submitted to international venues; prepared figures/dashboards.
- Collaborated with interdisciplinary teams across technology, psychology, and social sciences.

Teaching Experience

Part-time Trainer

SPMC Training Centre, Abu Dhabi | Oct 2022 - June 2023 & Sept 2013 - Nov 2016

- Conducted training programs in Oracle Database and SQL to diverse groups of students and professionals and provided practical database skills to the participants that can be directly applicable in industry settings.
- Mentored students on real-world database projects, bridging the gap between theoretical knowledge and practical application.
- Evaluated student progress through assessments, projects, and exercises to ensure their knowledge.
- Delivered technology awareness sessions to school-age children through a company partnership with local schools, introducing basic concepts and everyday applications of new technologies.

Teaching Assistant

MG University | Jan 2009 - March 2010

- Prepared and delivered lectures on topics such as programming, relational database management systems, data structures, and software design.
- Evaluated and graded students' classwork and assignments.
- Assisted the professors to prepare the deliverables for the lectures and in laboratory work.

Industrial Experience

Software Test Engineer

Tenova Systems | Nov 2019 - Sept 2022

- Conducted functional, integration, and accuracy testing of a real-time dashboard for monitoring real-time environmental sensor data (temperature, humidity, water quality). Performed stress testing and validated system behavior under scenarios such as sensor disconnections, missing data, and abnormal sensor values across interconnected components before deployment.
- Designed and maintained automated regression test scripts using Selenium to validate software functionality and detect regressions during pre-release testing.
- Audited role-based access controls across dashboard and API layers using permission boundary testing protocols; ensured administrative and operator roles were correctly enforced across all system interactions.
- Logged bugs in JIRA with clear reproduction steps, severity levels, and impact descriptions

Software Tester

24NXT Software | Jan 2016 - Oct 2019

- Executed functional and integration testing across e-commerce client platforms focusing on checkout flows and payment integrations; applied structured test case design and testing to ensure functional requirements were met before each client release.
- Documented defects in Jira with detailed reproduction steps and resolution guidance through collaboration with developers and designers; contributed to faster resolution cycles and reduced regression rates.
- Maintained comprehensive testing documentation, including test case libraries, test plans, and weekly progress reports using standardized templates, providing development teams with clear traceability across all quality assurance activities.

Skills

- **Testing & QA:** Selenium, Robot Framework, API Testing, End-to-End Testing, Unit Testing and Test Automation
- **Data analytics:** SQL, Python, Power BI, Tableau, Looker
- **Big Data analytics:** Apache Airflow, Apache Spark, ETL-putket
- **DevOps:** Git, Docker, JIRA

Certification

- Career Essentials in Data Analysis by Microsoft and LinkedIn Cours
- Certificate in ETL and Data Pipelines with Shell, Airflow and Kafka
- SAS Visual Analytics 1 & 2 for SAS Viya: Basics
- Complete C# Unity 2D Game Development
- EU AI Act Compliance Introduction - Udemy

Language skills

- English : Fluent
- Hindi : Native
- Finnish : Basic
